Hiring Manager

DataAnnotation

Software Development Team

Dear Hiring Manager,

I am writing to express my strong interest in the Software Developer position at DataAnnotation. With my background in computer science studies at Virginia Commonwealth University and hands-on experience in technical operations and problem-solving, I am excited about the opportunity to contribute to training AI chatbots for coding applications.

My experience in event management and technical setup has developed my ability to work with complex systems and troubleshoot issues efficiently. At TCC Entertainment, I managed audio/visual equipment setups and resolved technical challenges in real-time, skills that translate well to debugging and problem-solving in software development. My current computer science studies have given me a solid foundation in programming principles and logical thinking.

I am particularly drawn to DataAnnotation's mission of creating quality AI and the opportunity to work remotely while contributing to cutting-edge technology. The prospect of working with coding chatbots and helping measure their progress aligns perfectly with my interests in both technology and education. I am confident that my analytical mindset and dedication to quality work would make me a valuable addition to your team.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills and enthusiasm can contribute to DataAnnotation's important work in AI development. I look forward to hearing from you.

Sincerely,
Charles Legard
